

### About the Speaker

Claire Motto, MS, CCC-SLP, CBIS has been working at Genesis PT and Wellness in Bettendorf, IA since graduating from St. Ambrose University in 2016. The majority of Claire’s caseload are patients with neurologically-based injuries, specifically stroke and brain injury. Claire works both in an individual outpatient setting, as well as in a group setting through the LIFT program.

## Claire Motto, MS, CCC/SLP, CBIS

Genesis PT and Wellness, Speech Therapist

### Description

The Clubhouse Model is a form of community-based rehabilitation. A brain injury Clubhouse Model emphasizes the abilities of its members living with acquired brain injury. The Clubhouse Model encourages members to re-integrate into their community as they are assisted by clubhouse staff in a supported environment. Clubhouse members are empowered to return to meaningful occupations, enhanced quality of life, and participate in their community.

### Objectives

1. Understanding of the Clubhouse Model.
2. How the Clubhouse Model increases quality of life for person(s) after brain injury.
3. How the Clubhouse Model strengthens the members and community it serves.
